## The importance of a child having a medical home:

Having a medical home means that your child will have his/her own doctor. If your child has a medical home, you will know that there will be someone to treat your child when they are sick.

This doctor will be someone who knows you and your child and can make the best choices about their health care. The choices made about your child's health care can make the difference that will provide them with a healthy future.
